01 / E-WASTE COLLECTION

7 WASTE STREAMS

Small electronics. A dedicated place.

A clear, convenient collection point for small e-waste, with dedicated openings and space for educational information.

E-waste collection station

Separate collection of seven waste streams, including batteries, light bulbs, mobile phones and chargers.

Durable construction

Stainless-steel body for a lasting collection point.

Flexible configuration

Single-sided deposit openings as standard; double-sided openings available. One- or two-sided information display.

Made for your location

Custom colours, labels and logo. Clear pictograms. Position against a wall or as a freestanding unit.

A compact alternative

3 WASTE STREAMS

A smaller e-waste collection station with three separate waste streams. Personalisation is available to suit your space.

02 / HEX

50-70 L / CAPACITY

Distinctive shape. Intuitive sorting.

Polyethylene street bins that make recycling easy to recognise, with a distinctive hexagonal profile and colour-coded tops.

Built for outdoor use

Durable polyethylene resists corrosion, damage and changing weather conditions.

Easy to identify

Colour-coded tops help users recognise each waste stream and sort correctly.

Designed for public spaces

A distinctive form for streets, parks and green spaces.
